# SUBJECT INDEX

Adsorption pathway
Multiphoton and electron impact ionization of azirines: 3-methyl-2-phenyl-1-azirine at $\lambda = 248$ nm and 193 nm 53
Alkaloids
The laser desorption/laser ionization mass spectra of some indole derivatives and alkaloids 219
Alkane molecular ions
The determination of relative collision cross-sections 173
Amination
Gas-phase aromatic amination by protonated substituted phenylazides 89
Anion
A theoretical investigation of the multiple states of the $SF_6^-$ anion 185
Appearance energies
Multiphoton and electron impact ionization of azirines: 3-methyl-2-phenyl-1-azirine at $\lambda = 248$ nm and 193 nm 53

Catalysis
Proton transport in the catalyzed gas-phase isomerization of protonated molecules 95
Charge states
Multiple photoionization in Ne, Ar, Kr and Xe from 44 to 1300 eV 157
Chemical ionization
Collision-induced dissociation and neutralization–reionization mass spectra of dimethylhalonium ions 193
Gas-phase aromatic amination by protonated substituted phenylazides 89
Collision-activated dissociation
Effects of collisional cooling on ion detection in a quadrupole ion trap mass spectrometer 67
Collision-induced dissociation
The determination of relative collision cross-sections 173
Collision-induced dissociation and neutralization–reionization mass spectra of dimethylhalonium ions 193
Collisional cooling
Effects of collisional cooling on ion detection in a quadrupole ion trap mass spectrometer 67
Cyclopropane
Non-resonant multiphoton ionization of small cyclic molecules: a comparison of fragmentation pathways for ethylene sulfide, ethylene oxide, propylene oxide and cyclopropane 111
Cyclotron orbital radius
Cyclotron orbital radius determination in Fourier transform ion cyclotron resonance mass spectrometry 1

Density functional
A theoretical investigation of the multiple states of the $SF_6^-$ anion 185
Dimethoxycarbene
On the generation and identification of dimethoxycarbene and 2-oxazolidinylidene in the rarefied gas phase of the mass spectrometer 33
Dimethylhalonium ions
Collision-induced dissociation and neutralization–reionization mass spectra of dimethylhalonium ions 193

Electron affinity
A theoretical investigation of the multiple states of the $SF_6^-$ anion 185
Ethylene oxide
Non-resonant multiphoton ionization of small cyclic molecules: a comparison of fragmentation pathways for ethylene sulfide, ethylene oxide, propylene oxide and cyclopropane 111
Ethylene sulfide
Non-resonant multiphoton ionization of

small cyclic molecules: a comparison of fragmentation pathways for ethylene sulfide, ethylene oxide, propylene oxide and cyclopropane 111
Excess Gibbs free energy
The application of additional thermodynamic information to improve the results if the mass spectrum of a ternary system is incomplete 83

Fast atom bombardment
FAB-MS-Untersuchungen von Phospholipiden 21
Flash vacuum pyrolysis
Applications in gaseous ion and neutral chemistry using a six-sector mass spectrometer 205
Fragmentation
The laser desorption/laser ionization mass spectra of some indole derivatives and alkaloids 219
Fragmentation mechanism
Non-resonant multiphoton ionization of small cyclic molecules: a comparison of fragmentation pathways for ethylene sulfide, ethylene oxide, propylene oxide and cyclopropane 111
Fragmentation of neutrals
Collision-induced dissociation and neutralization–reionization mass spectra of dimethylhalonium ions 193
FT-ICR MS
Cyclotron orbital radius determination in Fourier transform ion cyclotron resonance mass spectrometry 1

Gas phase
Gas-phase aromatic amination by protonated substituted phenylazides 89

Indole derivatives
The laser desorption/laser ionization mass spectra of some indole derivatives and alkaloids 219
Ion detection
Effects of collisional cooling on ion detection in a quadrupole ion trap mass spectrometer 67
Ion/molecule reactions
Proton transport in the catalyzed gas-phase isomerization of protonated molecules 95
Ion traps
Cyclotron orbital radius determination in Fourier transform ion cyclotron resonance mass spectrometry 1
Ionic decay mechanism
Multiphoton and electron impact ionization of azirines: 3-methyl-2-phenyl-1-azirine at $\lambda = 248$ nm and 193 nm 53
Isomer distinction
The determination of relative collision cross-sections 173
Isomerization
Proton transport in the catalyzed gas-phase isomerization of protonated molecules 95
Isotope selectivity
Laser-induced isotopic selectivity in the resonance ionization of Os 123

Laser desorption
The laser desorption/laser ionization mass spectra of some indole derivatives and alkaloids 219
Laser ionization
The laser desorption/laser ionization mass spectra of some indole derivatives and alkaloids 219

Metastable decay
Multiphoton and electron impact ionization of azirines: 3-methyl-2-phenyl-1-azirine at $\lambda = 248$ nm and 193 nm 53
MIKES
FAB-MS-Untersuchungen von Phospholipiden 21
Molecular structure
A theoretical investigation of the multiple states of the $SF_6^-$ anion 185
Multiple UV photon ionization
Multiphoton and electron impact ionization of azirines: 3-methyl-2-phenyl-1-azirine at $\lambda = 248$ nm and 193 nm 53
Multi-step dissociation
Applications in gaseous ion and neutral chemistry using a six-sector mass spectrometer 205

Neutralization–reionization
Applications in gaseous ion and neutral chemistry using a six-sector mass spectrometer 205
Neutralization–reionization mass spectrometry
Collision-induced dissociation and neutralization–reionization mass spectra of dimethylhalonium ions 193
On the generation and identification of dimethoxycarbene and 2-oxazolidinylidene in the rarefied gas phase of the mass spectrometer 33
Non-resonant multiphoton ionization
Non-resonant multiphoton ionization of small cyclic molecules: a comparison of fragmentation pathways for ethylene sulfide, ethylene oxide, propylene oxide and cyclopropane 111

Osmium
Laser-induced isotopic selectivity in the resonance ionization of Os 123
2-Oxazolidinylidene
On the generation and identification of dimethoxycarbene and 2-oxazolidinylidene in the rarefied gas phase of the mass spectrometer 33

Partial photoionization cross-sections
Multiple photoionization in Ne, Ar, Kr and Xe from 44 to 1300 eV 157
Phenylazides
Gas-phase aromatic amination by protonated substituted phenylazides 89
Phospholipids
FAB-MS-Untersuchungen von Phospholipiden 21
Propylene oxide
Non-resonant multiphoton ionization of small cyclic molecules: a comparison of fragmentation pathways for ethylene sulfide, ethylene oxide, propylene oxide and cyclopropane 111
Proton transfer
Proton transport in the catalyzed gas-phase isomerization of protonated molecules 95

Radiolysis
Gas-phase aromatic amination by protonated substituted phenylazides 89
Rare gases
Multiple photoionization in Ne, Ar, Kr and Xe from 44 to 1300 eV 157
Relative cross-sections
The determination of relative collision cross-sections 173
Resonance ionization mass spectrometry
Laser-induced isotopic selectivity in the resonance ionization of Os 123

Stability
A theoretical investigation of the multiple states of the $SF_6^-$ anion 185
Structure determination
FAB-MS-Untersuchungen von Phospholipiden 21

Tandem mass spectrometer
Applications in gaseous ion and neutral chemistry using a six-sector mass spectrometer 205
Ternary system
The application of additional thermodynamic information to improve the results if the mass spectrum of a ternary system is incomplete 83

Very low vapour pressure pyrolysis mass spectrometry on the generation and identification of dimethoxycarbene and 2-oxazolidinylidene in the rarefied gas phase of the mass spectrometer 33
